

Rabbit Anti-Guinea Pig IgG H&L / AP antibody

SL0358R-AP

Product Name Rabbit Anti-Guinea Pig IgG H&L / AP

Chinese Name 碱性磷酸酶（AP）标记的兔抗豚鼠 IgG H&L

Alias Rabbit Anti-Guinea Pig IgG H&L (AP); Immunoglobulin G;

Immunogen Species Rabbit

Clonality Polyclonal

React Species Guinea Pig,

WB=1:1000-10000 ELISA=1:1000-10000 IHC-P=1:100-1000 IHC-F=1:100-1000

Applications not yet tested in other applications.
optimal dilutions/concentrations should be determined by the end user.

Form Liquid

Concentration 1.0 mg/ml

immunogen Native Guinea Pig IgG

Lsotype IgG

Purification affinity purified by Protein A

Buffer Solution 10 mM TBS (pH=7.4) with 1% BSA, 3% Proclin300 and 50% glycerol.

Storage Store at -20°C for one year. Avoid repeated freeze/thaw cycles.

Attention This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.

Product Detail Immunoglobulin G (IgG), is one of the most abundant proteins in serum with normal levels between 8-17 mg/mL in adult blood. IgG is important for our defence against microorganisms and the molecules are produced by B lymphocytes as a part of our adaptive immune response. The IgG molecule has two separate functions; to bind to the pathogen that elicited the response and to recruit other cells and molecules to destroy the antigen. The variability of the IgG pool is generated by somatic recombination and the number of specificities in an individual at a given time point is estimated to be 10¹¹ variants.
