

Rabbit Anti-Mink IgG/PE-Cy3 antibody

SL0777R-PE-Cy3

Chinese Name: Alias:	
Organism Species:RabbitClonality:PolyclonalReact Species:MinkFlow-Cyt=1:100-1000IF=1:100-1000Applications:not yet tested in other applications. optimal dilutions/concentrations should be determined by the end user.Molecular weight:150kDaForm:Lyophilized or LiquidConcentration:2mg/1mlimmunogen:Full length plasma protein:Lsotype:IgGPurification:affinity purified by Protein AStorage Buffer:0.01M TBS(pH7.4) with 1% BSA, 0.03% Proclin300 and 50% Glycerol.Storage:Storage: Store at -20 oC for one year. Avoid repeated freeze/thaw cycles. The lyophilized antibody is stable at room temperature for at least one month and for g than a year when kept at -20oC. When reconstituted in sterile distilled water or dil supplied, theantibody is stable for at least two weeks at 2-4 °C.Immunoglobulin G (IgG), is one of the most abundant proteins in serum with norm	
Clonality: Polyclonal React Species: Mink Flow-Cyt=1:100-1000IF=1:100-1000 Applications: not yet tested in other applications. optimal dilutions/concentrations should be determined by the end user. Molecular weight: 150kDa Lyophilized or Liquid Concentration: 2mg/1ml immunogen: Full length plasma protein: Lsotype: IgG Purification: affinity purified by Protein A Storage Buffer: 0.01M TBS(pH7.4) with 1% BSA, 0.03% Proclin300 and 50% Glycerol. Storage: Store at -20 oC for one year. Avoid repeated freeze/thaw cycles. The lyophilized antibody is stable at room temperature for at least one month and for g than a year when kept at -20oC. When reconstituted in sterile distilled water or dil supplied, theantibody is stable for at least two weeks at 2-4 °C. Immunoglobulin G (IgG), is one of the most abundant proteins in serum with norm
