Using highly purified synthetic cyclic citrullinated peptide as the antigen，Prepared antibody against CCP cyclic peptide; the anti-cyclic citrullinated peptide (CCP) antibody has high sensitivity and specificity for the diagnosis of rheumatoid arthritis,CCPThe antibody is currently mainly used for the early diagnosis of rheumatoid arthritis and the evaluation after treatment。 Highly purified synthetic cyclic citrullinated peptide as antigen，Detects anti-cyclic citrullinated peptide antibodies in serum，It has high value for the diagnosis of RA. The specificity of anti-cyclic citrullinated peptide antibodies in the affected population is 97%.
