[Primary Antibody]

Rabbit Anti-AAV5 capsid VP2 protein antibody

Catalog Number: SL11392R

FOR RESEARCH USE ONLY

[DATASHEET]

Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Target:	AAV5 capsid VP2 protein
Immunogen:	KLH conjugated synthetic peptide derived from Adeno-Associated Virus 5 capsid protein VP1: 511-560/724
Purification:	affinity purified by Protein A
Concentration:	1mg/ml
Storage:	0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4℃. Store at -20 °C for one year. Avoid repeated freeze/thaw cycles.
Applications:	ELISA (1:5000-10000) Not yet tested in other applications. Optimal working dilutions must be determined by the end user.
Reactivity:	(predicted:AAV5)
Predicted MW.:	80kDa
Background:	Adenoviruses are DNA viruses that cause upper respiratory tract infections, conjunctivitis, and other infections in humans. Adenoviruses were discovered in 1953. About 47 different types have been identified since then, and about half of them are believed to cause human diseases. Infants and children are most commonly affected by adenoviruses. Adenovirus infections can occur throughout the year, but seem to be most common from fall to spring. Adenoviruses are responsible for 3-5% of acute respiratory infections in children and 2% of respiratory illnesses in adults. **SWISS:** N/A **Gene ID:** N/A

Important Note: This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.
