

## Rabbit Anti-Delta 1 Tubulin antibody

SL14263R

<b>Product Name</b>	Delta 1 Tubulin
<b>Chinese Name</b>	微管蛋白 $\delta 1/\delta$ Tubulin 抗体
<b>Alias</b>	Delta tubulin; Delta-tubulin; FLJ12709; TBD_HUMAN; TUBD; TUBD1; Tubulin delta chain.
<b>Research Area</b>	Cell biology Neurobiology Signal transduction
<b>Immunogen Species</b>	Rabbit
<b>Clonality</b>	Polyclonal
<b>React Species</b>	Mouse(predicted:Human,Rat,Cow,Horse,Sheep) WB=1:500-2000
<b>Applications</b>	not yet tested in other applications. optimal dilutions/concentrations should be determined by the end user.
<b>Theoretical molecular weight</b>	51kDa
<b>Cellular localization</b>	cytoplasmic
<b>Form</b>	Liquid
<b>Concentration</b>	1mg/ml
<b>immunogen</b>	KLH conjugated synthetic peptide derived from human Delta 1 Tubulin: 151-250/453
<b>Lsotype</b>	IgG
<b>Purification</b>	affinity purified by Protein A
<b>Buffer Solution</b>	1M TBS(pH7.4) with 1% BSA, 3% Proclin300 and 50% Glycerol.
<b>Storage</b>	Shipped at 4°C. Store at -20 °C for one year. Avoid repeated freeze/thaw cycles.
<b>Attention</b>	This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.
<b>PubMed</b>	<a href="#">PubMed</a>
<b>Product Detail</b>	Tubulin is a major cytoskeleton component that has five distinct forms, designated a, b, g, d and e tubulin. a and b tubulins form heterodimers which multimerize to form a microtubule filament. Multiple b Tubulin isoforms (b1,

b2, b3, b4, b5, b6 and b8) have been characterized and are expressed in mammalian tissues. b1 and b4 are present throughout the cytosol, b2 is present in the nuclei and nucleoplasm, and b3 is a neuron-specific cytoskeletal protein. GammaTubulin forms the gammasome, which is required for nucleating microtubule filaments at the centrosome. Both d Tubulin and Delta Tubulin are associated with the centrosome. Gamma Tubulin is a homolog of the Chlamydomonas Gamma Tubulin Uni3 and is found in association with the centrioles, whereas e Tubulin localizes to the pericentriolar material. Delta Tubulin exhibits a cell cycle-specific pattern of localization; first associating with only the older of the centrosomes in a newly duplicated pair, and later associating with both centrosomes.

**Function:**

In the elongating spermatid it is associated with the manchette, a specialized microtubule system present during reshaping of the sperm head.

**Subcellular Location:**

Cytoplasm > cytoskeleton > centrosome > centriole. Cytoplasm. Nucleus. Associated with centrioles. Both cytoplasmic and nuclear.

**Similarity:**

Belongs to the tubulin family.

**SWISS:**

Q9UJT1

**Gene ID:**

51174

**Product Picture**

Sample: heart (Mouse) Lysate at 40 ug

Primary: Anti-Delta 1 Tubulin(SL14263R) at 1/300 dilution

Secondary: IRDye800CW Goat Anti-Rabbit IgG at 1/20000 dilution

Predicted band size: 51 kD

Observed band size: 58 kD
