[Primary Antibody]

Rabbit Anti-C1orf104 antibody

Catalog Number: SL15002R

FOR RESEARCH USE ONLY

[DATASHEET]

Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Target:	C1orf104
Immunogen:	KLH conjugated synthetic peptide derived from human C1orf104: 21-120/236
Purification:	affinity purified by Protein A
Concentration:	1mg/ml
Storage:	0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4℃. Store at -20 °C for one year. Avoid repeated freeze/thaw cycles.
Applications:	WB=1:500-2000 （Paraffin sections need antigen repair） not yet tested in other applications. optimal dilutions/concentrations should be determined by the end user.
Reactivity:	Human
Predicted MW.:	24kDa
Background:	Chromosome 1 is the largest human chromosome spanning about 260 million base pairs and making up 8% of the human genome. There are about 3,000 genes on chromosome 1, and considering the great number of genes there are also a large number of diseases associated with chromosome 1. Notably, the rare aging disease Hutchinson-Gilford progeria is associated with the LMNA gene which encodes lamin A. When defective, the LMNA gene product can build up in the nucleus and cause characteristic nuclear blebs. The mechanism of rapidly enhanced aging is unclear and is a topic of continuing exploration. The MUTYH gene is located on chromosome 1 and is partially responsible for familial adenomatous polyposis. Stickler syndrome, Parkinsons, Gaucher disease and Usher syndrome are also associated with chromosome 1. A breakpoint has been identified in 1q which disrupts the DISC1 gene and is linked to schizophrenia. Aberrations in chromosome 1 are found in a variety of cancers including head and neck cancer, malignant melanoma and multiple myeloma.

Important Note: This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.

	The C1orf104 gene product has been provisionally designated C1orf104 pending further characterization. **Database links:** **Entrez Gene:** 284618 Human **SwissProt:** Q66K80 Human

[VALIDATION IMAGES]

Sample:MCF-7(Human)Cell Lysate at 40 ug
Primary: Anti-C1orf104(SL15002R)at 1/300 dilution
Secondary: IRDye800CW Goat Anti-RabbitIgG at 1/20000 dilution
Predicted band size: 24kD
Observed band size: 24kD

Important Note: This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.
