[Primary Antibody]

Rabbit Anti-C1orf64 antibody

Catalog Number: SL15073R

FOR RESEARCH USE ONLY

[DATASHEET]

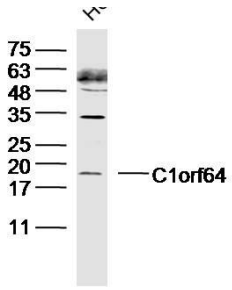

Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Target:	C1orf64
Immunogen:	KLH conjugated synthetic peptide derived from human C1orf64: 81-169/169
Purification:	affinity purified by Protein A
Concentration:	1mg/ml
Storage:	0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4℃. Store at -20 °C for one year. Avoid repeated freeze/thaw cycles.
Applications:	WB=1:500-2000 （Paraffin sections need antigen repair） not yet tested in other applications. optimal dilutions/concentrations should be determined by the end user.
Reactivity:	Human
Predicted MW.:	18kDa
Subcellular Location:	The nucleus Extracellular matrix
Background:	Chromosome 1 is the largest human chromosome spanning about 260 million base pairs and making up 8% of the human genome. There are about 3,000 genes on chromosome 1, and considering the great number of genes there are also a large number of diseases associated with chromosome 1. Notably, the rare aging disease Hutchinson-Gilford progeria is associated with the LMNA gene which encodes lamin A. When defective, the LMNA gene product can build up in the nucleus and cause characteristic nuclear blebs. The mechanism of rapidly enhanced aging is unclear and is a topic of continuing exploration. The MUTYH gene is located on chromosome 1 and is partially responsible for familial adenomatous polyposis. Stickler syndrome, Parkinsons, Gaucher disease and Usher syndrome are also associated with chromosome 1. A breakpoint has been identified in 1q which disrupts the DISC1 gene and is linked to schizophrenia. Aberrations in chromosome 1 are found in a variety of cancers including head and neck

Important Note: This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.

	cancer, malignant melanoma and multiple myeloma. The C1orf64 gene product has been provisionally designated C1orf64 pending further characterization. **Database links:** **Entrez Gene:** 149563 Human **SwissProt:** Q8NEQ6 human

[VALIDATION IMAGES]

Sample: HepG2 (human)cell Lysate at 40 ug
Primary: Anti- C1orf64 (SL15073R)at 1/300 dilution
Secondary: IRDye800CW Goat Anti-Rabbit IgG at 1/20000 dilution
Predicted band size: 18 kD
Observed band size: 18 kD

Important Note: This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.
