[Primary Antibody]

Rabbit Anti-C6orf136 antibody

Catalog Number: SL15219R

FOR RESEARCH USE ONLY

[DATASHEET]

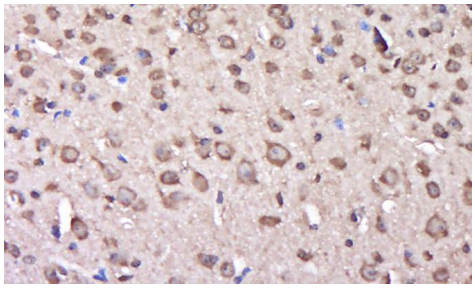

Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Target:	C6orf136
Immunogen:	KLH conjugated synthetic peptide derived from human C6orf136: 131-230/315
Purification:	affinity purified by Protein A
Concentration:	1mg/ml
Storage:	0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4℃. Store at -20 °C for one year. Avoid repeated freeze/thaw cycles.
Applications:	IHC-P=1:100-500 IHC-F=1:100-500 IF=1:100-500 （Paraffin sections need antigen repair） not yet tested in other applications. optimal dilutions/concentrations should be determined by the end user.
Reactivity:	Mouse(predicted:Human)
Predicted MW.:	36kDa
Subcellular Location:	cytoplasmic
Background:	Making up nearly 6% of the human genome, chromosome 6 contains around 1,200 genes within 170 million base pairs of sequence. Deletion of a portion of the q arm of chromosome 6 is associated with early onset intestinal cancer suggesting the presence of a cancer susceptibility locus. Porphyria cutanea tarda is associated with chromosome 6 through the HFE gene which, when mutated, predisposes an individual to developing this porphyria. Notably, the PARK2 gene, which is associated with Parkinson's disease, and the genes encoding the major histocompatiblity complex proteins, which are key molecular components of the immune system and determine predisposition to rheumatic diseases, are also located on chromosome 6. Stickler syndrome, 21-hydroxylase deficiency and maple syrup urine disease are also associated with genes on chromosome 6. A bipolar disorder

Important Note: This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.

	susceptibility locus has been identified on the q arm of chromosome 6. The C6orf136 gene product has been provisionally designated C6orf136 pending further characterization. **Database links:** **Entrez Gene:** 221545 Human **SwissProt:** Q32KT5 Cow S wissProt: Q5SQH8 Human

[VALIDATION IMAGES]

Paraformaldehyde-fixed, paraffin embedded (Mouse brain); Antigen retrieval by boiling in sodium citrate buffer (pH6.0) for 15min; Block endogenous peroxidase by 3% hydrogen peroxide for 20 minutes; Blocking buffer (normal goat serum) at 37°C for 30min; Antibody incubation with (C6orf136) Polyclonal Antibody, Unconjugated (SL15219R) at 1:400 overnight at 4°C, followed by operating according to SP Kit(Rabbit) (sp-0023) instructions and DAB staining.

Important Note: This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.
