[Primary Antibody]

Rabbit Anti-FLJ36180 antibody

Catalog Number: SL16126R

FOR RESEARCH USE ONLY

[DATASHEET]

Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Target:	FLJ36180
Immunogen:	KLH conjugated synthetic peptide derived from human FLJ36180: /351-450/468
Purification:	affinity purified by Protein A
Concentration:	1mg/ml
Storage:	0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. Shipped at 4℃. Store at -20 °C for one year. Avoid repeated freeze/thaw cycles.
Applications:	WB=1:500-2000 （Paraffin sections need antigen repair） not yet tested in other applications. optimal dilutions/concentrations should be determined by the end user.
Reactivity:	Human(predicted:Mouse,Rat,Dog,Pig,Cow,Sheep)
Predicted MW.:	53kDa
Background:	The RING-type zinc finger motif is present in a number of viral and eukaryotic proteins and is made of a conserved cysteine-rich domain that is able to bind two zinc atoms. Proteins that contain this conserved domain are generally involved in the ubiquitination pathway of protein degradation.TRIML1 (tripartite motif family-like 1), also known as RNF209 (RING finger protein 209), is a 468 amino acid protein that contains one SPRY domain and one RING-type zinc finger. Due to the presence of a RING-type zinc finger motif, TRIML1 may be involved in protein degradation events within the cell. **Function:** Probable E3 ubiquitin-protein ligase which plays an important role in blastocyst development. **Subunit:** Interacts with USP5 (By similarity). **Similarity:** Contains 1 B30.2/SPRY domain. Contains 1 RING-type zinc finger. **Database links:** **Entrez Gene:** 339976 Human

Important Note: This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.
