

Mouse Anti-Human IgG H&L (3D3) mAb antibody

SLM-0297M

Product Name	Mouse Anti-Human IgG H&L (3D3) mAb
Chinese Name	鼠抗人 IgG H&L 单克隆抗体
Alias	Immunoglobulin G (IgG); hu IgG; human Immunoglobulin G; hu Immunoglobulin G.
Immunogen Species	Mouse
Clonality	Monoclonal
Clone NO.	3D3
React Species	Human, WB=1:500-2000,IHC-P=1:100-500,IHC-F=1:100-500,ICC/IF=1:100-500,IF=1:100-500,ELISA=1
Applications	not yet tested in other applications. optimal dilutions/concentrations should be determined by the end user.
Form	Lyophilized powder
immunogen	Native Human IgG
Lsotype	IgG
Purification	Affinity purified by Protein G
Storage	Store at -20°C stable for 2 years (lyophilized powder). Avoid repeated freeze/thaw cycles.
Attention	This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications. Immunoglobulin G (IgG), is one of the most abundant proteins in serum with normal levels between 1-2g/L in adult blood. IgG is important for our defence against microorganisms and the molecules are produced by lymphocytes as a part of our adaptive immune response. The IgG molecule has two separate functions: to neutralize the pathogen that elicited the response and to recruit other cells and molecules to destroy the antigen. The variability of the IgG pool is generated by somatic recombination and the number of specificities in the pool at a given time point is estimated to be 1011 variants.
Product Detail	Gene ID: human IgG
